

Declaration of the Manufacturer ATEX

We confirm that our material

- **Murdotec® 1000 black AST**
- **Murdotec® 1000 E**
- **Murdotec® 1000 light AST**
- **Murdotec® 1000 white ESD**
- **Murdotec® 2000 black AST**
- **Murdotec® 2000 E**
- **Murdotec® 2000 GE**
- **Murdotec® 2000 MCE**
- **Murdotec® 2000 MCWE**
- **Murdotec® 500 black AST**
- **Dialen® MR black AST**

is designated to avoid the formation of electrostatic charging.

According to the evaluation of the electrostatic charging as per DIN EN ISO 80079-36:2016-12 resp. the material can be safely used for all explosion groups (I, IIA, IIB, and IIC) for its intended application in explosive areas in all zones, provided that a secure grounding of all goods out of this material is made.

Consequently, the material can also be used for devices and machineries which have to correspond to the requirements of the EU Directive 94/9/EC (also named ATEX 95) and 2014/34/EC.
